

8th INTERNATIONAL SCIENTIFIC CONFERENCE ON CLIMATE CHANGE, ECONOMIC DEVELOPMENT, ENVIRONMENT AND PEOPLE (CCEDEP 2019) under the title

Economic, Security and Environmental Challenges of Regional Development

Educons University, Novi Sad, Serbia

October 24TH, 2019

BACKGROUND:

The Alliance of South Eastern European Universities (<http://www.aceu-edu.org/>) organizes this year's 8th conference under the title *Economic, Security and Environmental Challenges of Regional Development*, providing an opportunity for all partners to play their part and present their ideas.

Theory of regional integration has long been the driving force behind the manifold development needs of small open economies of the South-Eastern Europe (and elsewhere), considering that their individual sizes are typically insufficient for reaching economies of scale. Consequently, they face obstacles in achieving competitiveness and sustainable export penetration of large markets on their own. However, regional integration processes in Europe seem to be in crisis themselves, due to various monetary, fiscal, banking, environmental, demographic, agricultural, security, political as well as trade issues and obstacles. This conference aims at addressing those challenges and offering potential solutions, with a particular focus on Central and South-East European economies and the EU.
